MADTECH Virtual Worksite (MVW)

- **Welcome to the MATRIX!** MVW is a hosted streaming service that literally puts you, along with others in different geographical locations, **working projects virtually inside digital twins of your facilities with the ability to see and talk to each other while collaborating.**
- **If you have no drawings, no information about current conditions, and no one who remembers any details about a facility; the MVW will quickly solve that problem and provide information needed!**
- **In less than 30 Days, a seamless navigable MVW Digital Twin, with all surfaces and equipment captured, that is dimensionally accurate for a 400,000 sqft facility, can be made ready for use!**
- **Reduces 1-3 year facility data collection processes to less than 30 days**
- If changes to facilities are made, MADTECH updates the MVW digital twin for future project use, so you **immediately know the exact conditions**, measurements, and details of your facilities without ever physically going to them or needing to rescan them.
- Projects are placed 3D inside the MVW, so vendors can job walk virtually without going to site!
- **MVW virtual job walks save 10-50% on costs**, because there is no project information missing!
- **Decisions regarding "will it fit," "will it work," or "is it the best option," are made in digital space, preventing very expensive wrong decisions being made in the real world!**
- MADTECH has an ISNetworld Grade A for Exemplary Safety and can work all environments.

PRICING

Current price is 48 cents per square foot to create MVW which comes with 1 year, ten-person user license. After first year, license costs \$18,000/year adjusted by CPI. Updates to MVW Baseline Digital Twin, project support, and online support are charged at T&M rates of \$116/hr. Travel costs are billed separately at cost plus 15%. **Baseline Digital Twin never needs to be re-done; MVW enables stitching in the scans of the facility areas changed at low cost. No re-scanning for new projects!**

SPECIAL OFFER

Customers with multiple facilities can pay for MADTECH Virtual Worksite (MVW) for one facility and get the second one done for free. If you have twenty facilities, pay for ten and get ten free. Customers get one free MVW compatible laptop and Virtual Reality (VR) Set for each 360,000 square foot MVW of facilities paid for. Order must be placed by May 1, 2022, using code "MADTECHPACKEXPO." First ten companies to place orders get the discount. If you have one facility, discount is 20%.
